

## Essex County College Police Academy Emergency Medical Training Courses

As a registered American Heart Association Community Training Center, the Essex County College Police Academy is available to assist your agency or community group with all of its CPR training needs. We offer many levels of CPR and AED (Automatic External Defibrillator) training for not only the Professional Rescuer, but the layperson as well. Rather than offering prescheduled classes that may not meet your needs, we ask that any agencies or groups that require assistance with their CPR training, contact our EMS Coordinator, Sergeant Michael Tomich at (973) 877-4356 or [Tomich@essex.edu](mailto:Tomich@essex.edu). We can design a custom built course of training at the appropriate certification level to suite your specific needs and schedule. Our academy offers:

- Emergency Medical Dispatch Certification
- Emergency Medical Technician Recertification
- First Responder Recertification for Law Enforcement Officers
- Public Safety Telecommunicator/Basic 9-1-1
- Public Safety Telecommunicator/Emergency Medical Dispatch Refresher
- Public Safety Telecommunicator Instructor Course
- Bloodborne Pathogens Instruction and Recertification
- Combat Casualty Care: this course is limited to Emergency Response Tactical Units

Contact the Essex County College Police Academy for further information regarding these and other courses offered.
